RF Logics Newsletter February 2008

RFLOGICS
The New Paradigm of Security

Luncheon Invitation

February 21, 2008
Double Tree Hotel, Torrance

Join us for a Luncheon Seminar for our Exciting new product launch and discussion of its application on how it can benefit your company's bottom line on Thursday, February 21, 2008 at the Double Tree Hotel, Torrance.

Space is Limited. Click Here to RSVP for this event

Topic of Discussion:

1. XAD Access Control DVR
2. RFL450 Passive-ISO Card Long Range Reader

Save on Equipment Deployment Time and End-user training time with a single, one-box solution for integrating Access Control and DVR features.

XAD Access Control DVR integrates all aspects of Physical Access Control and Time & Attendance in a single package eliminating the need for running multiple computer workstations. XAD Access Control DVR also enables security administrators to cross reference Access, Alarm Events and Time & Attendance Database synchronized with Visual CCTV Security. Convergence Pro is available from a 4~32 (960 / 960 FPS) Camera systems with expandable access control to over 100 doors.

For a complete preview, please check out our website:
