PCSC Selects RF Logics RFID, Smart Card and Biometric Devices

Torrance, CA, March 1, 2005 – RF Logics Inc., suppliers of high security proximity card reading systems, smart card systems and fingerprint and facial recognition biometric readers for access control applications, announces that PCSC of Torrance, California has selected RF Logics as one of their business partners to supply their complete range of RF Logics readers, cards and biometric systems for use with their wide range of software and control panels.

Based in Torrance, California, PCSC is one of the leading designers and manufacturer of quality access control solutions including sophisticated access control management software with integrated video badging, CCTV control, alarm graphics, elevator control and video event recording.

"This relationship with RF Logics provides us with a full range of card based and biometric identification products with many unique features, which are tailored to operate with our standard field panels," said Mas Kosaka, President and CEO of PCSC. "We look forward to a long and very fruitful relationship".

PCSC will be showing the new RF Logics products at this years ISC West in Las Vegas, Nevada from April 6th – 8th 2005 on their booth #21067.
